

Our Collaboration Server can make short work of getting projects approved and delivered. By harnessing the power of Adobe® Acrobat® and Reader®, you'll never have to wait for a colleague to get back to the office to review a project. You can work on them anywhere you have Internet access. It could be at home, on the road—wherever, whenever.

Even if your coworkers aren't online, for example, on a plane, they can make comments in the PDF file—and when they're back online, post them to our Server for review. We can make your collaboration easy, secure and trouble free.

Here's how it works:

1. Create your PDF.
2. Send emails to your coworkers with the PDF attached for review in Acrobat.
3. Your coworkers can see and respond to comments made on the emailed PDF. Everyone shares the same set of comments.
4. Buster Creative manages the comments in real time.

It's easy to use

- All you need on your desktop is the Free Adobe Reader
- Nothing to install
- No need to beg your IT department for anything
- You don't have to be an existing client
- We can set you up in 10 minutes

It saves time

- No need to consolidate multiple sets of revisions into one document
- Available 24/7/365
- You don't have to be in the office to use it—anywhere with Internet access is fine

It saves money

- You see your coworkers comments immediately—resulting in fewer errors
- All comments are logged and available anytime
- No long-term contract
- Your first project is FREE
